Open Minds Knowledge Technologies LLC

Open Minds to understand your needs

Knowledge to
*Analyze,
Organize,
Implement and
Manage*

Technologies are our tools and the basis of solutions.

Let us translate your intangible needs into business reality

We help you see the big picture and delve into the details that really matter to your business.

After an investigative phase, we concisely summarize and communicate our findings.

We are experienced at implementing and managing the designs proposed for your success.

Whether you are looking for an independent reviewer or a versatile team player, our services will meet your needs.

Know what I mean? ...

As Knowledge Domain Interpreters we bring different disciplines together and ensure knowledge transfer (meaningful exchange of information).

We do systems analysis and design across multiple technologies for complete solutions.

A bit about experience...

Vertical Industries:

C3IWS, ATC, AD, AS, Logistics, Process Control, Discrete Manufacturing, Data capture and processing, Airframe and other mobile platform simulation and trainers, High-End Film and Video, CAE, PACS, Radiology, Telemedicine

Horizontal industries and markets:

Government (direct, sub and prime contracting), Real-time, Simulation, HPTC and Medical Imaging

Architectures:

Networking, high performance storage, archival storage, graphics, data management, SQL, BizTalk, XML and computational platforms.

Technologies:

Graphics, real-time, HPTC, data capture/reduction and communications.

See www.omkt-llc.com for more details.

Product and Project management

- Market analysis
- Feasibility analysis, advanced research and development
- Building core competencies
- Market building with prospective customers
- Managing the combined business, engineering, finance, manufacturing and service team
- Ensuring long-term customer satisfaction

Bid and Proposal

- Strategies for opportunities
- Winning the business
- Implementing the solution

Marketing Assistance

- Promoting capabilities and brands
- Product introductions
- Training
- Ad-hoc chalk talk to multi-media presentation
- Building presence and sales via one-on-ones to international tradeshows

Software skills

- Coding in low level macro/assembly through 4 GL and frameworks
- Visual Studio and . NET environments
- Web development (scripts and tools)
- BizTalk, XML and SQL
- Linux, Windows 9x/Me/NT, OpenVMS, Tru64 UNIX

Hardware platforms

- Embedded realtime
- PCI, cPCI and PMC
- PCs to High Performance Technical Computing Clusters
- AlphaServers
- Storage Area Networks
- Networking
